

# DEER RESISTANT PLANTS

## PLANTS THAT ARE LESS ATTRACTIVE TO DEER

Deer damage to plants has become an increasing problem in the urban areas in recent years. This is a list of plants that deer do not typically eat, but please keep in mind that no plant is absolutely safe—if the deer are hungry enough they will eat almost anything.

### Annuals

Ageratum  
Amaranth  
Begonia Wax  
Cleome  
Cosmos
